

Joke API Project (Flask)

This is a simple Flask API that returns random jokes. It demonstrates basic backend development using Python and Flask.

Features:

- Home route
- Random joke endpoint (/joke)
- Personalized joke endpoint (/joke/<name>)

```
from flask import Flask, jsonify
import random

app = Flask(__name__)

jokes = [
    "Why did the developer go broke? Because he used up all his cache.",
    "Why do programmers prefer dark mode? Because light attracts bugs.",
    "Why was the computer cold? It forgot to close Windows.",
]

@app.route('/')
def home():
    return "Welcome to Joke API 🍷"

@app.route('/joke')
def joke():
    return jsonify({"joke": random.choice(jokes)})

@app.route('/joke/<name>')
def personalized_joke(name):
    return jsonify({"joke": f"Hey {name}, {random.choice(jokes)}"})

if __name__ == '__main__':
    app.run(debug=True)
```

How to Run:

1. Install Flask: pip install flask
2. Run: python app.py
3. Open: <http://127.0.0.1:5000/joke>
